**** PUBLIC NOTICE ****

The Federal Aviation Administration is conducting an aeronautical study concerning the following:

Structure Type: Antenna Tower
 Location: NORTH BERGEN, NJ
 Latitude: 40-48-45.5 NAD 83
 Longitude: 74-2-19
 Heights: 421 feet above ground level (AGL)
 427 feet above mean sea level (AMSL)

The structure as described above exceeds obstruction standards. To determine its effect upon the safe and efficient use of navigable airspace by aircraft and on the operation of air navigation facilities, the FAA is conducting an aeronautical study under the provisions of 49 U.S.C., Section 44718 and, if applicable, Title 14 of the Code of Federal Regulations, part 77.

In the study, consideration will be given to all facts relevant to the effect of the structure on existing and planned airspace use, air navigation facilities, airports, aircraft operations, procedures and minimum flight altitudes, and the air traffic control system.

Interested persons are invited to participate in the aeronautical study by submitting comments to the above FAA address. To be eligible for consideration, comments must be relevant to the effect the structure would have on aviation, must provide sufficient detail to permit a clear understanding, must contain the aeronautical study number printed in the upper right hand corner of this notice, and must be received on or before 6/2/2004.

This notice may be reproduced and circulated by any interested person. Airport managers are encouraged to post this notice.

Additional Information for ASN 2004-AEA-633-OE

Proposal: To construct a seven-antenna tower array to a height of 421 feet above ground level, 427 feet above mean sea level.

Location: The structure will be 2.47 nautical miles southeast of Teterboro Airport, Teterboro, New Jersey; 11,237 feet from the approach end of runway 01.

Federal Aviation Regulation, FAR Part 77, Obstruction Standards Exceeded:

Section 77.23(a)(5) Airport Surfaces by penetrating
Section 77.25(d) (conical surface) by 214 Feet- a height that exceeds a takeoff or landing area of an airport, as applied to TEB.

Note: Preliminary study disclosed no instrument impact
